**Caratteristiche:** Tavolino dal design lineare e funzionale con piano in marmo; disponibile rotondo o quadrato. Adatto ad ambienti residenziali così come ad aree lounge e raffinati progetti contract. **Struttura:** Piano in marmo Nero Marquina o Emperador, spessore mm 20. Il marmo è un prodotto naturale, che presenta di volta in volta venature, concentrazioni di colore e macchie chiaro scure sempre diverse. La superficie può presentarsi irregolare e in alcuni punti può risultare più o meno lucida, queste sono caratteristiche che determinano la naturalità del marmo stesso, quindi queste imperfezioni devono essere accettate in quanto caratteristiche inevitabili e naturali di questi materiali. Specialmente il marmo Emperador e il marmo Nero Marquina presentano normalmente e per loro struttura numerose fessure, microfratture, fori e micro fori. Quelli più evidenti vengono resinati, stuccati, ricostruiti. Questo non pregiudica la qualità o la tenuta strutturale del prodotto. Base in pressofusione di alluminio verniciata color bronzo.

**Features:** Coffee table with a linear and functional design with marble top; available round or square. Suitable for residential environments as well as for lounge areas and refined contract projects. **Structure:** Top in Black Marquina or Emperador marble, 20 mm thick. Marble is a natural material showing veins, concentrations of colour as well as light and dark spots which are different every time. The surface may appear uneven and in some places it may be more or less shiny, these are characteristics that determine the naturalness of the marble itself, therefore these imperfections must be accepted as inevitable and natural characteristics of these materials. Emperador and Nero Marquina marbles show in their natural form numerous cracks, micro-cracks, holes and micro holes. The most evident ones are sealed, plastered or rebuilt, but this does not affect the quality or structural strength of the product. Base in die-cast aluminum painted in bronze color.

**Eigenschaften:** Couchtisch mit einem linearen und funktionellen Design mit Marmorplatte; verfügbar in rund oder quadratisch. Geeignet sowohl für Wohn- als auch für Lounch Bereiche und raffinierte Vertragsprojekte. **Struktur:** Tischplatte aus Marmor Nero Marquina oder Emperador, 20 mm stark. Marmor ist ein Naturprodukt, das abwechselnd Äderungen, unterschiedliche Farbkonzentrationen sowie helle und dunkle Flecken zeigt. Die Oberfläche kann uneben und an einigen Stellen mehr oder weniger glänzend sein. Dies sind Eigenschaften, die die Natürlichkeit des Marmors bestimmen. Diese Makel sind zu akzeptieren, da unvermeidliche und natürliche Eigenschaften dieses Materials. Insbesondere der Marmor Emperador und der Nero Marquina weisen normalerweise zahlreiche Risse, Mikrorisse, kleine Löcher auf. Die am sichtbarsten werden verharzt, verputzt und rekonstruiert. Dies beeinträchtigt in keiner Weise die Qualität oder strukturelle Stabilität des Produkts. Untergestell aus Aluminiumdruckguss, bronzefarben lackiert.
